Critical Care 2006, **10**:414 (doi:10.1186/cc4996)

It has been brought to our attention that there was a typographical error in our review article [1] published in February 2000.

The last sentence of the abstract should read:

"Two randomized studies found that, in difficult-to-wean patients, synchronized intermittent mandatory ventilation (SIMV) is the most ineffective method of weaning."
