Overview

ALERT Inc is a non-profit organization providing information about latex allergy and supporting health care operators as well as natural rubber latex (NRL) allergic individuals. The site features a resources/lists section containing four lists (hospital, dental, home and school) of common use latex-containing products and their latex-free alternatives. The hospital list of products is a valuable reference when preparing intensive care unit bedsites or operating theatres for latex-allergic patients; it offers many latex-free alternatives for each instrument/product. The ALERT website also includes a quarterly newsletter and a links section.

Content

A useful site to help health care operators meet latex allergic people needs.

Other comments

25 April 1999
