## Overview

A new symposium has recently been added at the site, entitled 'Recent Novel Therapies in the Treatment of Acute Coronary Syndromes'. Presented as a satellite symposium on Saturday 6 March 1999 at the 1999 American College of Cardiology meeting, this symposium presented new information on the use of ion pumpinhibitors and thrombolytics in the management of cardiovascular disease.

The faculty and topics included:

Robert Roberts, MD, Program Chairman

Metin Avkiran, PhD: *Scientific basis of NHE in acute cardiac ischemia*

John Speer Schroeder, MD: *Clinical potential of NHE inhibition - the GUARDIAN trial*

Pierre Theroux, MD, Program Co-Chairman: *Panel discussion/Question and answers*

*Hirudin is superior to heparin in acute coronary syndromes*

Point: James H Chesebro, MD

Counterpoint: Robert M Califf, MD

Transcription-only and Multimedia (RealPlayer® technology required) versions are available both providing the full slide show and the text of the presentations.

## Other comments

March 1999.

## Evaluation

None.
