Overview

This site sells itself as a one-stop collection of links for the health care professional who specialises in infectious disease. The latest links include [The%20Vaccine%20Page](#) which contains the latest vaccine news as well as a database, and the [Centre%20of%20Virology](#) at the University of Bergen: Norway's largest virology research centre.

Content

This site has a huge number of links. The layout is simple, and the site loads quickly. The site does have a search facility (search term pneumonia gives 7 hits) but as it is essentially a collection of links, it is likely that there will be a lot of "clicking" to find specific information.

Other comments

29th October 1999

Evaluation

none
